Wind slab avalanches on Blackmore

Mt Blackmore
Northern Gallatin
11/22/2018
Code
HS-N-R1-D1
Elevation
9500
Aspect
E
Latitude
45.44430
Longitude
-111.00000
Notes

From an email:

"Went up to Blackmore for a pre-Thanksgiving dinner walk yesterday. Winds had moved a good bit of snow since Wednesday and I observed debris from several avalanches on the east face...Most of the slides were thin, probably fresh wind slabs failing on the latest batch of NSFs. The largest slide had some pretty sizeable chunks of hard slab style debris in it."

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Hard slab avalanche
Trigger
Natural trigger
R size
1
D size
1
Problem Type
Wind-Drifted Snow
