Instability in the Lionhead Range

Date Sat, 12/16/2023 - 05:05 Activity Skiing

Widespread wumfing between 7,000 - 8,700ft. in Targhee Creek. (12/15)

No natural slides observed.

Crazy large surface hoar also observed on open, southerly clearings, measured 1+ cm. Very rotten snowpack otherwise.

Region Lionhead Range Location (from list) LIONHEAD AREA Observer Name E. Webb
