Notes

Toured up around fairy lake today, winds were ripping all day. Saw several d1 soft slabs in upper elevation terrain, many of them running quite far. We opted ski a lower elevation zone and were surprised to find a soft [slab](#) (d1/r1) that ran on an east facing slope at about 7500' and about 500-600 ft below the ridge line on a slope just over 30 degrees.
