

Point releases, wet loose in Beehive/Middle Basin

Beehive Basin
Northern Madison
3/29/2025
Code
WL-N-R1-D1.5
Latitude
45.34070
Longitude
-111.39100
Notes

Toured around Beehive and Middle Basins this morning, finding predictably bulletproof snow on most aspects but decent turns aided by the 2-4 inches of snow from last night on northerly terrain that hadn't been destroyed by the sun this week. There were a few brief moments of direct sun throughout the morning, which almost instantaneously triggered point releases from steeper rocky terrain. On the way back through Beehive we observed some much larger debris piles that weren't there this morning from the steel rocky face between the Going Home chute and the prayer flags.
